ITEM CONTINUATION

*We are temporarily using a pump to divert this water until we can repair our diversion. We are diverting the water at a reduced undetermined rate until we can repair diversion.*

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and per 1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

JUN 04 1999

Coloma-Lotus Ditch Association  
c/o Mr. James Barnett  
P.O. Box 550  
Lotus, CA 95651

Dear Mr. Barnett:

### WATER RIGHTS COMPLAINT FROM THE CALIFORNIA SPORTFISHING PROTECTION ALLIANCE REGARDING DIVERSION FROM THE SOUTH FORK AMERICAN RIVER IN EL DORADO COUNTY

The State Water Resources Control Board's (SWRCB) Division of Water Rights has received a complaint from the California Sportfishing Protection Alliance (CSPA). The complaint alleges that the Coloma-Lotus Ditch Association (Association) may be diverting water without a valid basis of right. A copy of the complaint is enclosed for your review.

I am aware that Statement of Water Diversion and Use No. S000388 is on file with this office under the Association's name. While this document is not by itself a basis of right, the information contained therein indicates that the initial diversion of water into the Coloma-Lotus Ditch began prior to 1853. Therefore, a valid claim to a pre-1914 appropriative right may very well have been initiated. CSPA representatives have indicated to me that they believe a sufficient period of nonuse occurred after 1914 so that any claim of a pre-1914 appropriative right for the Coloma-Lotus Ditch that may have been initiated would no longer be valid.

According to a letter contained in the file for S000388 dated June 17, 1987, from Brian E. Maloney, counsel for the Association, to the Board Members of the Association, the El Dorado Irrigation District contracted with the Coloma-Lotus Ditch Company from 1966 through 1986 to operate and maintain the ditch as well as supply the Company's customers with water. This letter also contains the following discussion of pre-1914 rights:

*"... with regards to the maintenance and disposition of pre-1914 water rights, I wish to bring the following to the Board's attention. I should also note that this is merely general information and it is necessary for me to complete my research before the following should be acted upon.*

JUN 04 1999

*Prior to 1872, appropriative water rights could be acquired by simply taking and beneficially using water. Thereafter, in 1872, the legislature enacted certain laws which were included in the Civil Code and which established a permissive procedure for perfecting an appropriation of water. Basically speaking, these provisions, including posting the notice of appropriation at the proposed point of diversion and recording a copy thereof with the County Recorder. Under such sections, if the statutory procedures were followed and the appropriation was completed with due diligence, the appropriative right related back to the date of posting.*

*Where a water right was acquired under these early laws, it could only be maintained by continuous beneficial use of the water. Thus, regardless of the amount claimed in the original notice of appropriation, or at the time of diversion and use first began, the amount which can now be rightfully claimed under a pre-1914 appropriative right is the amount fixed by actual beneficial use both as to the amount and season of diversion. Such a right can be lost either by abandonment (where there is the intent to abandon) or merely by nonuse.*

*If a claim to water based upon a pre-1914 appropriative right is disputed, the law will require evidence of both the original appropriation and the subsequent maintenance of the right by continuous and diligent application of water to beneficial use. Moreover, a record of such water use under a pre-1914 appropriative right should be established by the filing of a statement of water diversion and use. The law requires that such a statement be completed for diversions during the calendar year and should be filed before July 1 of the following year.*

*With respect to the transfer of a pre-1914 water right, much has been written with respect to the problem of uncertainty as to the amount of water which can be transferred. This is mainly due to the absence of quantity restrictions and centralized recording which renders it difficult to determine with any degree of precision exactly what amount of water an appropriator may claim under any particular pre-1914 right.*

*In addition, it has long been settled in California that an appropriator may change the point of diversion, place of use, or character of the use of water in the exercise of his appropriative right without affecting his right to divert and use the water, provided that the rights of others are not thereby impaired. The Water Code provides that where a person is entitled to the use of water by virtue of an appropriation made prior to the effective date of the Water Commission Act, he may 'change the point of diversion, place of use, or purpose of use if others are not injured by such change, and may extend the ditch, flume, pipe or*

JUN 04 1999

*aqueduct by which the diversion is made to places beyond that where the first use was made'. Section 1706 California Water Code. It should be noted that this is a general rule only and that a subsequent appropriator is free to claim that a change in the point of diversion has resulted to his or her injury."*  
(double underlining mine)

Did Mr. Maloney ever complete his research? If not, do you have evidence of both the original appropriation and the subsequent maintenance of the right by continuous and diligent application of water to beneficial use from 1914 until today? The file for S000388 only contains limited information regarding diversions made during 1966 and the period between 1989 and 1995. Submittal of documentation regarding the full record of diversion from 1914 to today would significantly aid our analysis of this complaint.

I have also enclosed "Answer to Complaint" forms and an information pamphlet regarding our complaint process. Please respond to the allegations in the complaint within 15 days from the date of this letter. Upon receipt of your response, all items submitted by each party will be evaluated to determine whether further action is required by the SWRCB.

If there are any questions, I can be reached at (916) 657-1945.

Sincerely,

Mr. Frederick C. McKain  
Engineering Department  
El Dorado Irrigation District  
Placerville, CA 95667

Dear Mr. McKain:

REPORTING REQUIREMENTS/STATUS FOR EL DORADO IRRIGATION DISTRICT  
(EID) WATER RIGHTS; APPLICATION NOS. A1692, A7478, A11675,  
A13794, A14426, & A15140; STATEMENT OF WATER DIVERSION AND USE  
NOS. ~~S388~~, S9304, S9528, S10717, S13501, & S13502

This letter is to follow up several phone conversations since  
January 5, 1995 concerning the status of reports required for the  
different water rights held by EID. The information provided  
below is based on our automated database, the "Water Rights  
Information Management System," rather than a comprehensive  
review of the files. Please let us know of any discrepancies.

APPROPRIATIVE RIGHTS

Our records indicate that EID, as sole owner, had filed sixteen  
applications for appropriative rights. Ten of these are no  
longer active, with seven cancelled before being permitted and  
three being revoked. Of the six that are active, five have been  
licensed while one is still under permit. Our records do not  
show any active permits or licenses with EID listed as a  
co-owner.

For a project under a permit, an annual "Progress Report by  
Permittee" is required until the project is licensed. Our  
records indicate that EID has one project under permit,  
specifically Permit 4071 (Application 7478) on the Middle Fork  
Cosumnes River. No annual progress report has been submitted  
since 1989 for this permit. As requested, enclosed for your  
completion are duplicate pre-printed copies of the 1991, 1992,  
and 1993 Progress Report forms for Permit 4071. I was unable to  
locate a pre-printed duplicate Progress Report form for 1990.

For projects that have been issued licenses, pre-printed "Report  
of Licensee" forms are distributed for completion on three-year  
intervals. The Licensee Reports for three of your licenses were  
last submitted for the three-year interval ending in 1988.

These three licenses are: (1) License 2184 (Application 1692), North Fork Weber Creek; (2) License 11400 (Application 11675), South Fork American River; and (3) License 11401 (Application 15140), South Fork American River. Enclosed for your completion are the duplicate pre-printed copies of Licensee Report forms for 1989, 1990, and 1991 for these rights.

The Licensee Reports for the remaining two licenses were last submitted for the three-year interval ending in 1984. These licenses are: (1) License 8176 (Application 13794), Deer Creek; and (2) License 8177 (Application 14426), also on Deer Creek. Enclosed for your completion are duplicate pre-printed copies of Licensee Report forms for 1988, 1989, and 1990 and for 1991, 1992, and 1993 for these rights. (I was unable to locate duplicate copies of the Licensee Report forms for 1985, 1986, and 1987.) In one of our conversations, you indicated you were going to research whether there had been a change of ownership on these two rights. Enclosed for your convenience are copies of Form WR 29a, Notice of Assignment, which can be used to inform us of any ownership changes.

We are currently changing over to a new database and also have switched to a new mailing schedule for the pre-printed Licensee Report forms. All Licensee Report forms will be sent out alphabetically, with the first third being sent out at the end of this month and subsequent thirds sent out over the following two years. Therefore, it appears that the Licensee Report forms covering the three-year interval of 1992, 1993, and 1994 for all your licenses will be sent to you this month. Because of this new schedule, there will be duplicate reporting for some years.

#### RIPARIAN AND PRE-1914 APPROPRIATIVE RIGHTS

Persons diverting water under claim of riparian rights or pre-1914 appropriative rights, with certain exceptions, are required to file a "Statement of Water Diversion and Use" (Statement) with our office. The Statements are completed for diversions during a calendar year and should be filed before July 1 of the succeeding year. Thereafter, pre-printed Supplemental Statement forms are distributed for completion at three-year intervals. For additional information, please refer to the enclosed pamphlet titled "Statements of Water Diversions and Use," July 1977.

Our records show that EID has filed six Statements. One of these, S388, South Fork American River, was subsequently transferred to the Coloma-Lotus Ranch Ditch Users Association in 1991.

Frederick C. McKain

-3-

A summary of the remaining five Statements, including the last year we have records of water use, is provided below:

<u>No.</u>	<u>Source</u>	<u>Year</u>
S09304	Bass Lake Reservoir	1988
S09528	Clear Creek	1977
S10717	South Fork American River	1989
S13501	North Fork Cosumnes River	1990
S13502	Clear Creek	1990

I was unable to locate any duplicate pre-printed Supplemental Statement forms distributed on three-year intervals for these diversions. As a result, enclosed are blank Supplemental Statement forms for your use.

Similar to the Licensee Report forms, the mailing of the Supplemental Statement forms will be switched to alphabetical, with the first third mailed this month. Therefore, you should receive all of your pre-printed Supplemental Statement forms for 1992, 1993, and 1994 by the end of this month.

Thank you for your cooperation and if you have any questions, please write or telephone me at the above number.

Sincerely,

Amounts ☐ Gallons  
below are: ☐ Acre-feet  
☐ \_\_\_\_\_ (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1986													None
1987													None
1988													None

B. Purpose of Use - Specify number of acres irrigated, stock watered, perched, etc.

Irrigation \_\_\_\_\_

Stockwatering \_\_\_\_\_

Domestic \_\_\_\_\_

Other (specify) \_\_\_\_\_

C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

The District no longer diverts water into the Coloma-Lotus Ditch from this point on the So. Fork American River. In 1985 the operation of this ditch was returned to the land/ditch owners. Diversion of water and operation of the ditch has since been the responsibility of the Coloma-Lotus Ranch Ditch Company.

D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

Re: Issues Pertaining to Coloma-Lotus Ditch

Dear Members of the Board:

As we have discussed in the past, I have researched several important issues involved in the above matter and wish to report to the Board on what I have found.

First of all, with respect to the status of the Coloma-Lotus Ditch Company as a public utility, it appears to me that such company may be found to be a public utility and subject to the jurisdiction of the Commissioner of the Public Utilities Commission.

As you are aware, the Coloma-Lotus Ditch Company is a very loosely organized group of individuals who own or claim to own undivided interests or shares in the Coloma-Lotus ditch and water appropriated into such ditch. In 1966, the Coloma-Lotus Ditch Company contracted with the El Dorado Irrigation District ("EID") whereby the District agreed to operate and maintain the ditch, and, in addition, supply the Company's customers with water. Moreover, as everyone is now aware, EID supplied water under such agreement until January 1, 1987, when it elected not to renew the contract.

Section 2701 of the Public Utilities Act provides as follows:

"Any person, firm or corporation, their lessees, trustees, receivers of trustees appointed by any court whatsoever, owning, controlling, operating, or managing any water system within this State, who sells, leases, rents,

Board of Directors  
Coloma-Lotus Ditch Users Assn.  
Page Two  
June 17, 1987

or delivers water to any person, firm, corporation, municipality, or any other political subdivision of the State, whether under contract or otherwise, is a public utility, and is subject to the provisions of Part 1 of Division 1 and to the jurisdiction, control and regulation of the commission, except as otherwise provided in this chapter."

Thus, it does appear that the Coloma-Lotus Ditch Company would fall under the class of individual or entity described by this section and would be found to be a public utility.

The Code does expressly exempt, however, mutual water companies which are organized solely for the purpose of delivering water to its members at cost and to no one else except as permitted by statute. Section 2705, Public Utilities Code.

Additionally, the Code further provides a procedure for obtaining a determination that a given person or firm is in fact a public utility and is subject to the Commissioner's jurisdiction. Section 2707 of the Code provides that:

"For the purpose of determining the status of any person, firm, or corporation, their lessees, trustees, receivers or trustees appointed by any court..., owning, controlling, operating or managing any water system or water supply within this state, the commission may hold hearings and issue process and orders in the manner and to the same extent provided in Part 1... (commencing with Section 201), and the finding and conclusions of the commission on questions of fact arising under this chapter are final and not subject to review, except as provided in Part 1... (commencing with Section 201).

The effect of finding a person or firm to be a public utility and subject to the Commissioner's jurisdiction is that such person or firm must first petition the Public Utilities Commission ("PUC") for approval of certain proposed action before so acting. Thus, for example, it has been held that if improvements in the service offered are required, and adequate financing is available, the utility should be ordered to make such improvements even if the utility has in the past relied primarily on internally generated funds. Petition of Park Water Co. (1968) 68 Cal. P.U.C. 672.

LAW OFFICES OF  
HEFNER, STARK & MAROIS

Board of Directors  
Coloma-Lotus Ditch Users Assn.  
Page Three  
June 17, 1987

Also, it has been held that authorization to discontinue the furnishing of water must also be first obtained. Rancho Green Valley Water Co. (1953) 53 Cal. P.U.C. 83.

Secondly, with regards to the maintenance and disposition of pre-1914 water rights, I wish to bring the following to the Board's attention. I should also note that this is merely general information and it is necessary for me to complete my research before the following should be acted upon.

Prior to 1872, appropriative water rights could be acquired by simply taking and beneficially using water. Thereafter, in 1872, the legislature enacted certain laws which were included in the Civil Code and which established a permissive procedure for perfecting an appropriation of water. Basically speaking, these provisions, including posting the notice of appropriation at the proposed point of diversion and recording a copy thereof with the County Recorder. Under such sections, if the statutory procedures were followed and the appropriation was completed with due diligence, the appropriative right related back to the date of posting.

Where a water right was acquired under these early laws, it could only be maintained by continuous beneficial use of the water. Thus, regardless of the amount claimed in the original notice of appropriation, or at the time of diversion and use first began, the amount which can now be rightfully claimed under a pre-1914 appropriative right is the amount fixed by actual beneficial use both as to the amount and season of diversion. Such a right can be lost either by abandonment (where there is the intent to abandon) or merely by nonuse.

If a claim to water based upon a pre-1914 appropriative right is disputed, the law will require evidence of both the original appropriation and the subsequent maintenance of the right by continuous and diligent application of water to beneficial use. Moreover, a record of such water use under a pre-1914 appropriative right should be established by the filing of a statement of water diversion and use. The law requires that such a statement be completed for diversions during the calendar year and should be filed before July 1 of the following year.

HEFNER, STARK & MAROIS

Board of Directors  
Coloma-Lotus Ditch Users Assn.  
Page Four  
June 17, 1987

With respect to the transfer of a pre-1914 water right, much has been written with respect to the problem of uncertainty as to the amount of water which can be transferred. This is mainly due to the absence of quantity restrictions and centralized recording which renders it difficult to determine with any degree of precision exactly what amount of water an appropriator may claim under any particular pre-1914 right.

In addition, it has long been settled in California that an appropriator may change the point of diversion, place of use, or character of the use of water in the exercise of his appropriative right without affecting his right to divert and use the water, provided that the rights of others are not thereby impaired. The Water Code provides that where a person is entitled to the use of water by virtue of an appropriation made prior to the effective date of the Water Commission Act, he may "change the point of diversion, place of use, or purpose of use if others are not injured by such change, and may extend the ditch, flume, pipe or aqueduct by which the diversion is made to places beyond that where the first use was made". Section 1706, California Water Code. It should be noted that this is a general rule only and that a subsequent appropriator is free to claim that a change in the point of diversion has resulted to his or her injury.

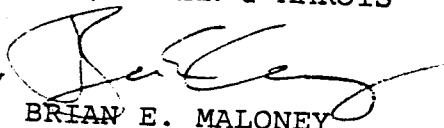

As you all are aware, the issues which are presented in this matter are quite complex and should be researched thoroughly. However, the above information should provide you with a sufficient guidance so that you can make an informed decision with respect to how to proceed at this point.

Please call if you have any questions or comments.

Very truly yours,

HEFNER, STARK & MAROIS
